

June 2012

My assessment/evaluation:

"Our experience with DocuClass has been very good. The software is functional and user-friendly, and has allowed us to optimize and automate manual processes.

I estimate that this has resulted in a cost reduction of about 30% in logistics operations, use of space and information search and retrieval; as we go forward automating other processes with DocuClass, we expect cost reduction reaching up to 40%."
