

# GRUPOMEXICO

January 2012

---

In my opinion, the service and product you provide is of excellent quality, especially because [DocuClass] has allowed us to not only meet our previously established goals within a timely fashion, but also to fulfill all our technical and functional requirements.

Having a turnkey solution, from implementation to operation and digitalization, greatly helped us to successfully execute a project of such nature. The main benefits from converting all our blueprints digitally are the security, durability, as well as the "ease of access" to information which is provided by your solution.

From an IT perspective, it is very convenient that a large portion of the system is available via the Web. I think that the remaining modules and functionality should be added to the Web as well. In the same way, we are very interested to see the development and implementation of web services to integrate [DocuClass] with 3rd party applications. The solution has worked very well in a virtual environment and we expect that future versions will be the same.

To summarize, we are very pleased with the results and we plan to expand the system in the future!

Mario Palomera  
Director of New Development and Technology
