

DocuClass Mobile with Workflow Capability

Access all your information from your smartphone or tablet

The DocuClass mobile solutions allow organizations to access and update information from any mobile device. Users cannot only access documents and data, but also participate in workflows and other business processes, directly from their mobile device, all with an easy to use, streamlined user interface.

Benefits:

- Browse, search, retrieve documents (have access to latest updated documents, like contracts, marketing material, orders, etc)
- Upload new documents, classify and index
- Take pictures and upload to them directly to DocuClass
- Initiate and Participate in any Business Workflow
 - o Search/retrieve documents from WF Queue
 - o Apply workflow commands (approve, route for evaluation, etc)
 - o Follow email links to review/approve
- Apply batch operations to selected documents (i.e. email), without transferring actual documents from the server
- Add geo-location information automatically
