

Optimizing Claim's Adjustment with DocuClass

As a TPA, processing and adjusting claims is what you do. Adjusting claims involves digging and processing through hundreds of forms, reports, correspondence, and images. All of these can reach you by paper mail, email, and various other electronic platforms and it can be a headache just to manage these across many locations. DocuClass as a Service can help! DocuClass is a cloud solution designed to streamline TPA operations, making it more efficient and cost effective.

Claims Adjustment Electronic Process

Improve your productivity and provide better service with DocuClass

- Increase productivity and competitiveness
- Reduce costly paper handling and manual routing
- Achieve quicker responses
- Receive incoming emails faster
- Accelerate internal routing process
- Provide better service to your clients and claimants

Decrease paper use and processing costs by **35%**

DocuClass drastically reduces the need for paper movement, from mail room to adjuster. Adjusters receive documentation faster, allowing them to spend more time working with documents.

DocuClass will also reduce the time to process the documentation allowing easy search across electronic files. Each claim will be processed faster without the need to file paper and search a filing cabinet.

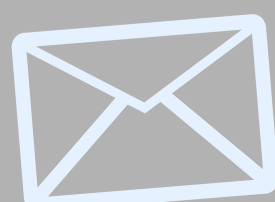

Prior to ASC implementing DocuClass, electronic documents that our adjusting staff received via email were printed to paper and placed in the claim's paper file folder. With DocuClass we no longer need to maintain a paper file folder and no longer have to manually locate claim file folders.

"All of the adjuster's claim documents are in DocuClass, no more paper shuffling."

Success Case
