

CIMA Software supplies ELAIS - Unilever Hellas with DocuClass eLogistics software to automate IoD & PoD Processes

CIMA Software signed a contract with ELAIS - Unilever Hellas to install & support DocuClass eLogistics in a Cloud environment. The project aims to optimize and automate all processes related to the recognition, automatic electronic archival and verification of invoices / shipping notes signed from their recipients (Proof of Delivery - PoD), to monitor shipments delivery status (Information of Delivery - IoD), to timely manage any process exception and generate automatically metrics & KPI's of all related processes

An important challenge of the project is the combination and unification of information and data originating from different internal systems and multiple 3PL providers the company works with

ELAIS – Unilever Hellas is a leading company in the non-durable consumer goods space, with products portfolio in the areas of Food, the Home and Personal Care and Health
